Uitrusting

There are few cars that walk the line between the track and the open road as perfectly as the 991 GT3 RS.

With its naturally aspirated 4.0L flat-six and that unmistakable wail at 8,800 rpm, this example offers a driving experience like no other.

While its sprint from 0-100 km/h in just 3.3 seconds (and a top speed of 310 km/h) is very impressive, the real magic lies in its handling.

Thanks to the downforce and immense G-forces this RS can generate, it cuts through every corner with incredible speeds and surgical precision.

Furthermore, the front of the car is equipped with PPF paint protection film and it boasts a full service history at the brand dealership.
